

 PRODUCTS FOR BATTERY

Electrolyte Additives for LiB and SiB

Product Description

A wide range of battery electrolyte additives - customisable for your needs and for scaling up your battery function.

	#	Product Name	Acronym	CAS No.
LiB	1	Lithium bis(fluorosulfonyl)imide solution	LiFSI	171611-11-3
	2	Lithium di(fluorosulfonyl)imide	LiFSI	171611-11-3
	3	Lithium difluoro(oxalato)borate	LiODFB	409071-16-5
	4	Lithium tetrafluoroborate	LiBF4	14283-07-9
	5	Lithium triflate	LiTF	33454-82-9
	6	Lithium bis(oxalato)borate	LiBOB	244761-29-3
	7	Lithium difluorobis(oxalato)phosphate solution	LiDODFP	678966-16-0
	8	Tetravinylsilane	TVSI	1112-55-6
	9	1,3,6-Hexanetricarbonitrile	HTCN	3386-87-6
	10	Ethylene Glycol Bis(propiontrile) Ether	DPN	3386-87-6
SiB	11	Sodium hexafluorophosphate	NaPF6	21324-39-0
	12	Sodium bis(fluorosulfonyl)imide	NaFSI	100669-96-3
	13	Phosphorodifluoridic acid sodium salt	NaPO2F2	15587-24-3
	14	Sodium difluoro(oxalato)borate	NaODFB	2102517-30-4
	15	Sodium difluorodioxalate phosphate	NaDODFP	1085277-57-1
	16	Sodium tetrafluoroborate	NaBF4	13755-29-8
	17	Sodium tetrafluoro(oxalato)phosphate	NaOTFP	1085277-61-7
	18	Sodium fluorosulfate	NaSO3F	14483-63-7
	19	Sodium dioxalate borate	NaBOB	83145-77-1

Advantages

- » Improve electrolyte stability
- » Increase charge/discharge capacity
- » Improve life cycle of battery

Applications

- » LiB
- » SiB
